INVESTMENT OBJECTIVE: CONSERVATIVE

December 2021

This model is designed for clients who are prepared to invest with the aim of growing their capital modestly over the longer term by taking a low level of risk. The portfolio aims to be resilient and **will invest in equities but this will typically represent no more than 35% of the model, what's more they will be selected for their low risk defensive nature.** Fixed interest and alternative investments will constitute the rest of the portfolio, exposure to these asset classes will change over time and will also be selected for their defensive qualities. Currency exposure is achieved by tailoring the asset class selection towards US dollar.

CUMULATIVE PAST PERFORMANCE (%)

Past performance is not indicative of future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than the amount invested.

	CUMULATIVE(%)						DISCRETE(%)				
	1m	3m	6m	1yr	3yrs	5yrs	2020	2019	2018	2017	2016
Conservative Portfolio (USD)	-0.85	-2.26	0.39	4.18	26.79	-	9.18	15.12	-	-	-

ARC USD Cautious	5.25	4.46	4.41	0.76	4.09

Please note:

The chart above shows the performance of the Conservative Model from 21 Mar 2018 when the model launched. Performance is illustrated net of the underlying fund charges but is gross of the Rowan Dartington annual management charge. The Rowan Dartington portfolios are only held with the third party platform providers and the illustrated performance excludes the relevant platform providers custody charge which may be different depending on the platform.

The discrete periods are calendar years. The 12 month performance periods are to the last quarter end, the model is less than 5 years and therefore shows the full performance of the calendar years available.

For purposes of this factsheet, the portfolio's performance has been measured against the relevant Private Client Indices (PCI) produced by Asset Risk Consultants. The ARC PCIs are a set of risk-based indices designed to assess the performance of diversified portfolios. The PCIs are based on actual client portfolios and performance is illustrated net of all ongoing charges.

KEY POINTS

Strategic asset allocation investment process

Portfolio designed for combination of income and capital growth

High quality Internationally domiciled collectives in three currencies (£, \$, €)

INVESTMENT OUTLOOK

The discovery of a new variant of Covid-19 sent markets into risk-off mode in November. Global equities fell in local currency terms, while safe haven currencies such as the US Dollar and Japanese Yen rallied. The transmissibility, severity of illness and efficacy of vaccines will be the primary concerns for health authorities and for investors; if further lockdowns are required this could halt the progress of the economic recovery. Inflation remains a key issue for markets, with the newly re-nominated US Federal Reserve chair Jerome Powell stating that it is time to retire the word transitory as broad pressures continue to build. Markets now expect an acceleration of asset purchase tapering with a first rate rise likely to come in the first half of 2022. In the UK, a widely expected rate rise from the Bank of England was not forthcoming, despite ten-year inflation expectations hitting their highest level since the bank became independent in 1997.

ASSET, GEOGRAPHIC & RISK ALLOCATION

Please note:

* This is the maximum management charge that will be applied to this portfolio. If you are unsure as to the charge applicable in your own circumstances, please contact your portfolio manager.

COLLECTIVE PORTFOLIO SERVICE: GLOBAL CONSERVATIVE (USD) - LOW RISK

GENERAL RISKS

The past performance is not a reliable guide to future performance. The value of shares and the income from them can fall as well as rise and **investors may get back less than they originally invested. The tax treatment of investments depends on each individual's circumstances and is subject to changes in tax legislation.** The sterling value of overseas investments, and the income from them, is subject to currency fluctuations. All estimates and prospective figures quoted in this publication are forecast and are not guaranteed.

SPECIFIC RISKS

Bond: The fund holds bonds issued by companies and governments. There is a chance that some of the companies and government that issue the bonds will fail to make interest or capital payments or other investors may believe the security of the government or company has declined, both of which would reduce the value of your investments. The value of bonds are also sensitive to change in interest rates, for an example, an increase in interest rates may cause a fall in the value of an investment in bonds.

Equity: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as **more general market factors. Consequently, the value of equities can rise and fall sharply at times and returns aren't guaranteed.**

Emerging markets: This portfolio holds investments in less developed economies and invests in less mature stock markets, so its value may fluctuate more than a fund which invests in developed countries.

Property: This fund invests mainly in property (i.e. land and buildings). Property can be difficult to sell in a short period, so you may not be able to sell or switch out of the investment when you want to due to the delay in acting upon the instruction. The value of property can fall as well as rise, particularly if there are more people trying to sell rather than buy, and is generally a matter of a valuers opinion until the property is sold.

IMPORTANT INFORMATION
