## INVESTMENT OBJECTIVE:

June 2022

The model is designed to be medium risk and generate a total return from investment into a combination of capital growth and income generating funds. It is suitable for clients who want a balanced portfolio, that invests in a range of asset classes and aims to provide a modest level of income and a capital return over the longer term. It will be invested in funds that incorporate into their decision making the impact companies have on the environment and a broad range of social issues, with the overarching intention of investing to bring positive change. It is a complex subject and this model offers a pragmatic approach to investing responsibly.

## CUMULATIVE PAST PERFORMANCE (%)

— Intermediaries Ethical & Environmental  
 — IA Mixed Investment 40-85% Shares  
 Jan 13 - Jun 22 Data from FE fundinfo 2022

Past performance is not indicative of future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than the amount invested.

## CUMULATIVE (%)

	1m	3m	6m	1yr	3yrs	5yrs
Intermediaries Ethical & Environmental	-5.35	-9.55	-16.55	-13.05	7.39	20.10
IA Mixed Investment 40-85% Shares	-4.53	-7.40	-10.81	-7.16	8.77	18.18

## 12 MONTH DISCRETE PERFORMANCE PERIODS (%)

	Jun 21 - Jun 22	Jun 20 - Jun 21	Jun 19 - Jun 20	Jun 18 - Jun 19	Jun 17 - Jun 18
Intermediaries Ethical & Environmental	-13.05	19.91	2.99	5.18	6.33
IA Mixed Investment 40-85% Shares	-7.16	17.29	-0.11	3.62	4.85

Please note:

The chart above shows the performance of the Intermediaries Ethical & Environmental Model from 02 Jan 2013 when the model launched. Performance is illustrated inclusive of any changes to the model, any underlying fund charges, and Rowan Dartington's management and administration fees. The illustrated performance excludes the relevant platform providers custody charge which may be different depending on the platform.

Data from 1 month through to 5 years is cumulative (%). The cumulative periods are for the period stated, for example 3m, up until the most recent date as shown on the chart. The 12 month discrete performance periods are to the last month end.

All past performance information is on a bid to bid basis in pounds sterling.

The benchmark selected is the one most suitable for this model's asset allocation.

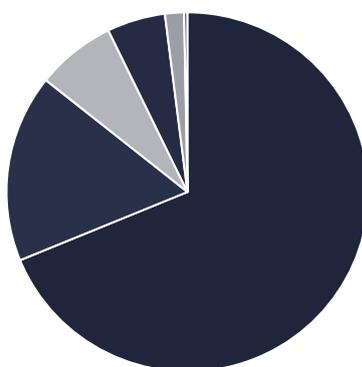

**KEY POINTS**

- Strategic asset allocation investment process
- Returns via selected ethical and environmental investments
- Multiple asset classes
- High quality securities
- Active management
- 4D Investment Monitoring - Full details available on request

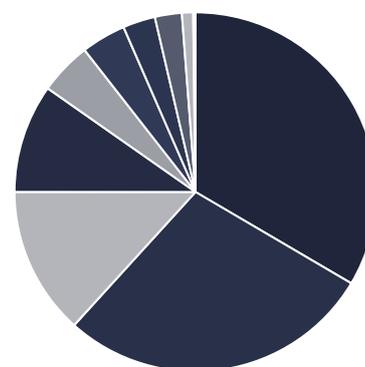

**INVESTMENT OUTLOOK**

International equity markets fell in June as fears rose that central bank tightening will trigger a recession. With the US labour market still looking healthy, the Federal Reserve is giving its full attention to bringing down inflation, enacting the largest single rate hike since 1994. Inflation remains at a 40-year high, so a series of further hikes is expected this year. Chinese equities continued to prove their value as a diversifier, bucking the trend to post strong gains as several pressures showed signs of easing. Lockdown restrictions in Beijing and Shanghai have been relaxed, allowing a rebound in industrial and retail activity; the non-manufacturing PMI indicated growth for the first time since February. This model's mix of assets is intended to provide a broadly balanced portfolio and is selected from a restricted list of investments due to its ethical and environmental remit. Any returns will be made up from both capital and income.

Please note:  
Please find the definitions for each 'Risk Group' in our Investment Risk Classification Matrix. The risk gauge is a graphical representation of the portfolio's risk weighting for illustrative purposes only.

<sup>1</sup> The Ongoing Charges Figure (OCF), Transaction and Incidental costs are those relating to investments made and held on the Rowan Dartington platform. If you are investing via an alternative third-party platform, the OCF and other costs may be different and will depend on the types of units (retail or institutional, for example) that can be accessed via that third party platform. Rowan Dartington cannot be held responsible for any changes in the published OCF or other costs when using a third party platform.

<sup>2</sup> Portfolio yield gives an indication of the current level of income which is expected to be distributed over the coming 12 months. This is based on the current holdings within the portfolio, and after the deduction of the investment funds' annual management charges – it is gross of basic rate tax. It excludes the annual Rowan Dartington management charge.

<sup>3</sup> Our Annual Management Charge (AMC) is the maximum management charge that will be applied to this portfolio. If you are unsure as to the charge applicable in your own circumstances, please contact your portfolio manager.

## GENERAL RISKS

---

The past performance is not a reliable guide to future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than they originally invested. The tax treatment of investments depends on each individual's circumstances and is subject to changes in tax legislation. The sterling value of overseas investments, and the income from them, is subject to currency fluctuations. All estimates and prospective figures quoted in this publication are forecast and are not guaranteed.

## SPECIFIC RISKS

---

**Equity:** This portfolio invests in equities. The value of equities can rise and fall quite sharply at times. Returns are not guaranteed and, whilst equities have tended to outperform over the long term, there have been periods when equities have fallen significantly in value over the short term.

**Bond:** This portfolio holds bonds issued by companies and governments. There is a chance that some of the companies or governments that issued these bonds will fail to make interest or capital payments, or other investors may believe the security of the government or company has declined, both of which would reduce the value of your investments. The values of bonds are also sensitive to changes in interest rates; for example, an increase in interest rates will usually cause a fall in the value of an investment in bonds.

**Emerging Markets:** This portfolio holds investments in less developed economies and invests in less mature stock markets, so its value may fluctuate more than a portfolio which invests in developed countries.

**Property:** This portfolio invests in property (i.e. land and buildings). Property can be difficult to sell in a short period, so you may not be able to sell or switch out of the investment when you want to due to the delay in acting upon the instruction. The value of property can fall as well as rise, particularly if there are more people trying to sell rather than buy, and is generally a matter of a valuers opinion until the property is sold.
