INVESTMENT OBJECTIVE:

September 2026

The aim of your portfolio is to deliver long-term returns exceeding those of the ARC Steady Growth benchmark, while remaining within your risk profile and adhering to our Responsible Investment Framework. Additional assets may be held within the portfolio when they are deemed important for prudent diversification and risk management purposes, provided we do not consider them to be in conflict with the overall mandate of the model. The portfolio aims to achieve this return primarily through capital appreciation, but also may generate returns from income. Equity exposure will range from 55% to 75%. Rowan Dartington will manage your assets in line with your objective and risk profile throughout the lifetime of the portfolio, unless prevented from doing so by investment constraints agreed by you. Investors should be willing and able to put their capital at risk and be able to tolerate a loss to their investment or initial amount invested.

CUMULATIVE PAST PERFORMANCE (%)

Intermediaries Ethical & Environmental

ARC Sterling Steady Growth PCI

Dec 12 - Sep 26 Data from FE fundinfo 2026

Past performance is not indicative of future performance. Please refer to page 3 for all Benchmark explanations. The value of shares and the income from them can fall as well as rise and investors may get back less than the amount invested.

CUMULATIVE (%)

	1m	3m	6m	1yr	3yrs	5yrs

12 MONTH DISCRETE PERFORMANCE PERIODS (%)

	Sep 25 - Sep 26	Sep 24 - Sep 25	Sep 23 - Sep 24	Sep 22 - Sep 23	Sep 21 - Sep 22
Intermediaries Ethical & Environmental	9.74	3.56	11.65	1.88	-15.51
ARC Sterling Steady Growth PCI	10.54	7.80	12.24	4.56	-10.12

The benchmark selected is the one most suitable for this model's asset allocation.

All figures are percentage growth on a bid to bid basis for accumulation units, income reinvested and in fund currency. Portfolios are not rebalanced automatically with regard to a central model and will have different securities and fund allocations such as their bespoke nature, often also influenced by capital gains tax. Therefore, individual investment experience will vary to that shown. For the performance of your own portfolio, you should refer to your personalised quarterly valuation or request a detailed portfolio performance review.

KEY POINTS

- Strategic asset allocation investment process
- Returns via selected ethical and environmental investments
- Multiple asset classes
- High quality securities
- Active management
- 4D Investment Monitoring - Full details available on request

Portfolios are not rebalanced automatically with regard to a central model and will have different securities and fund allocations such is their bespoke nature, often also influenced by capital gains tax. Therefore, individual investment experience will vary to that shown. Past performance of the individual funds are displayed through the fund factsheets, which are available on request.

INVESTMENT OUTLOOK

Bond markets remained the dominant story in September, with a sharp global sell-off pushing yields higher. Despite rising yields, equity performance was bifurcated. US growth stocks and Japanese equities generated solid gains, while European and UK equities lagged, with higher bond yields, weaker economic momentum, higher energy prices and continued concerns around the growth outlook weighing on sentiment. Schroder Global Alternative Energy endured a torrid month, leaving performance broadly flat for the year after giving back earlier gains. Higher oil prices have turbocharged performance amongst traditional energy companies, while alternative energy businesses and their supply chains remained under pressure from elevated financing costs, persistent inflation concerns and rising interest rate expectations. Portfolios remain broadly neutral equity risk. We view the economy as in the late cycle phase – in which equities typically do well, albeit with increased volatility – with our base case scenario being a soft landing.

Please note:
Please find the definitions for each 'Risk Group' in our Investment Risk Classification Matrix. The risk gauge is a graphical representation of the portfolio's risk weighting for illustrative purposes only.

[1] The Ongoing Charges Figure (OCF), Transaction and Incidental costs are those relating to investments made and held on the Rowan Dartington platform. If you are investing via an alternative third-party platform, the OCF and other costs may be different and will depend on the types of units (retail or institutional, for example) that can be accessed via that third party platform. Rowan Dartington cannot be held responsible for any changes in the published OCF or other costs when using a third party platform.

[2] Portfolio yield gives an indication of the current level of income which is expected to be distributed over the coming 12 months. This is based on the current holdings within the portfolio, and after the deduction of the investment funds' annual management charges – it is gross of basic rate tax. It excludes the annual Rowan Dartington management charge.

[3] Our Annual Management Charge (AMC) is the maximum management charge that will be applied to this portfolio. If you are unsure as to the charge applicable in your own circumstances, please contact your portfolio manager.

GENERAL RISKS

The past performance is not a reliable guide to future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than they originally invested. The tax treatment of investments depends on each individual's circumstances and is subject to changes in tax legislation. The sterling value of overseas investments, and the income from them, is subject to currency fluctuations. All estimates and prospective figures quoted in this publication are forecast and are not guaranteed.

SPECIFIC RISKS

Equity: This portfolio invests in equities. The value of equities can rise and fall quite sharply at times. Returns are not guaranteed and, whilst equities have tended to outperform over the long term, there have been periods when equities have fallen significantly in value over the short term.

Bond: This portfolio holds bonds issued by companies and governments. There is a chance that some of the companies or governments that issued these bonds will fail to make interest or capital payments, or other investors may believe the security of the government or company has declined, both of which would reduce the value of your investments. The values of bonds are also sensitive to changes in interest rates; for example, an increase in interest rates will usually cause a fall in the value of an investment in bonds.

Emerging Markets: This portfolio holds investments in less developed economies and invests in less mature stock markets, so its value may fluctuate more than a portfolio which invests in developed countries.

Property: This portfolio invests in property (i.e. land and buildings). Property can be difficult to sell in a short period, so you may not be able to sell or switch out of the investment when you want to due to the delay in acting upon the instruction. The value of property can fall as well as rise, particularly if there are more people trying to sell rather than buy, and is generally a matter of a valuers opinion until the property is sold.

IMPORTANT INFORMATION

This publication is provided solely to assist investors to make their own investment decisions, and is for illustrative purposes only. The Model Portfolio may not be suitable for all recipients and does not constitute a personal recommendation to invest, or a solicitation to purchase any investment or product. The opinions expressed within this are those of Rowan Dartington and are subject to change without notice. You should seek advice from your adviser before making any investments.

Rowan Dartington, its associate companies and/or their clients, directors and employees may own or have a position in the securities mentioned herein and may add to or dispose of any such securities.
